

Protectores del Muro

⚔ Defenders of the Iron Wall ⚔

Warband

Rating: 698 🗳 | 0 🌟

Fielded: Elite: 4, Troop: 5, Mercenary: 0, Total: 9

Sipahi: Sipahi Automaton Cavalry often serves as infantry in the Iron Wall's units to reinforce areas under severe pressure. A Defenders of the Iron Wall Warband can include up to 1 Sipahi Automaton Cavalry at a cost of 110 🗳. They use the Mercenary Entry for a Mamluk Faris but you cannot change their Battlekit in any way. Note that this does not stop you from recruiting a Mamluk Faris as a Mercenary as well.

Silahdar: The commanders of the Iron Wall's units come from the personal bodyguards of the Sultan known as Silahdar. A Defenders of the Iron Wall Warband must include 1 Silahdar. The Silahdar uses the Yüzbaşı Warband Entry, except that it replaces the Mubarizun ability with the 🌟 Strong Keyword, and they can have an Alaybozan from the Iron Sultanate Armoury, and an Anqā Guard and Explosive Charges from the Defenders of the Iron Wall Armoury, at the indicated cost in 🗳 for each piece of Battlekit that is taken.

Siege Jezzail Teams: The Defenders of the Iron Wall are trained to use Siege Jezzails in pairs. Add 🎲 +1.Dice to the Success Roll for a Ranged Attack made with a Siege Jezzail if there is a friendly model within 1" of the model making the attack.

Sapper Corps: The standard divisions assigned to the Iron Wall have doublestrength Sapper detachments. A Defenders of the Iron Wall Warband can have 0-4 Sultanate Sappers.

Marksmanship of the Iron Wall: All the members of the Warband practise marksmanship from the dizzying heights of the Iron Wall against targets on the ground below. Add 🎲 +2.Dice instead of 🎲 +1.Dice to the Success Roll for a Ranged Attack made by models in a Defenders of the Iron Wall Warband when they have the Elevated Position modifier.

Janissary Officers: A Defenders of the Iron Wall Warband can have 0-2 Janissaries, which have the Elite Keyword at no additional cost in 🗳.

Grand Cannons: A Defenders of the Iron Wall Warband can include 0-2 Sultanate Grand Cannons at a cost of 60 🗳 each. When a Grand Cannon is added to a Defender of the Iron Wall Warband it must either be given to a Brazen Bull that is already part of the Warband, or added to the Armoury on the Warband's roster sheet as a Grand Cannon gun battery. No more than 1 Grand Cannon can be given to a Brazen Bull model, and a Warband cannot have more than 2 Grand Cannons in total. The rules for using the Grand Cannon during a game can be found in the Defenders of the Iron Wall Warband Battlekit section.

Far from the Sublime Gate: A Defenders of the Iron Wall Warband cannot include any Lions of Jabir, Yüzbaşı or Assassins, and models in the Warband cannot have a Cloak of Alamut or Wind Amulet.

NEGATE FEAR, NEGATE GAS, NEGATE FIRE, TOUGH, SULTANATE, STRONG, LEADER, ELITE, NEGATE HEAVY

Alaybozan	Range: 12"	Shrapnel Shield Combo
Greatsword / Greataxe	Range: Melee	+1 Injury Dice Critical Heavy
Alchemical Ammunition	Ammunition +1 Dice	
Guiding Path: Alchemical Ammunition can only be used with an Alaybozan, Halberd-Gun, Jezzail or Siege Jezzail (even though the Alaybozan has the Shrapnel Keyword). In a campaign, you cannot reallocate Alchemical Ammunition to another model		
Anqa Guard	Heavy Deployable	
Pre-Battle Deployment: After you deploy a model with an Anqā Guard, you can also deploy their Anqā Guard. If you do so, deploy the Anqā Guard anywhere wholly within your deployment zone. Once deployed, the model that had the Anqā Guard is not considered to be carrying it for the rest of the game. Combat Deployment: A model that has an Anqā Guard can take a Combat Deployment <u>Action</u> . If it does so, take a Risky Success Roll for the model and add +2 Dice to the roll. If the roll is a Failure, nothing happens and the model's Activation ends. If the roll is a Success or Critical Success, you can deploy the Anqā Guard within 1" of the model. Mobile Cover: Once deployed, the Anqā Guard is treated as a piece of Impassable terrain and can serve as Cover or a Defended Obstacle. The model that had the Anqā Guard is not considered to be carrying it for the rest of the game.		
Medi-Kit	-	
Treat: <u>Action</u> : A model with this Keyword can take a Treat <u>Action</u> . If it does so, take a Risky Success Roll for the model. If the roll is a Failure, the model's Activation ends immediately. If it is a Success or a Critical Success, you can do one of the following things: - Remove <u>1 Blood Marker</u> from the model or a friendly model within 1" of the model. - Stand up a friendly model that is Down and within 1" of the model.		
Trench Shield	-1 Injury Modifier	
Alchemist Armour	-2 Injury Modifier Negate Fire Negate Gas	
Protection From Harm: Add <u>-1 Injury Dice</u> to Injury Rolls for attacks made by Weapons with the Fire or Gas Keywords that target a model that has Alchemist Armour, even if the attacking weapon has the Ignore Armour Keyword.
